MILLWORK 360
THE DEGREE OF SUPERIOR QUALITY

A MASTERGRAIN CERTIFIED DISTRIBUTOR

ABOUT MILLWORK 360

Millwork 360 was founded with one core purpose in mind: to create custom mouldings and doors that reflect the highest degree of superior quality. Our commitment to our clients - and to exceptional craftsmanship - allows us to fulfill any residential or commercial product needs across the Southeastern United States. We strive to be the most dependable source for precise, beautiful, and durable products with short lead times and on-time deliveries.

ABOUT MASTERGRAIN

MasterGrain products are a premium line of fiberglass door system components featuring the most authentic wood grain replication in the door industry. MasterGrain combines beauty and high quality construction to its fiberglass doors so you can see 'The Difference is in the Details.'

MasterGrain is proud of its investment in the Canadian and American manufacturing infrastructure, and truly understands the marketplace it serves. Through creativity, innovation and leading-edge technology, MasterGrain will continue to develop the finest door system components to protect and enhance your home.

NVD GRAIN TECHNOLOGY

NVD Technology is a patented process that authentically replicates any natural surface. The door process begins by hand selecting the most desirable wood pieces to build a real wood door. A silicone casting accurately picks up the finest details of the wood grain and is transferred into a door mold using our NVD (Nickel Vapor Deposition) Technology. The mold produces fiberglass skins used on MasterGrain doors with random grain depths and all the natural characteristics of real wood making our doors virtually indistinguishable from real wood doors.

Every MasterGrain™ door is engineered and built in North America by skilled technicians to ensure the highest quality. Unlike other doors, the manufacturing processes and technologies which MasterGrain employs, eliminate the need to compromise between strength and lasting beauty.

- **Does NOT warp, rot or crack** like wood doors and requires less maintenance
- **Does NOT rust or dent** like steel doors
- Excellent grain and stain matching across fiberglass components
- Engineered for the extreme hot and cold temperatures of North America

STRENGTH

A pair of robust 4-1/16" stiles run down each side of the door slab. The stiles are made of 3-7/16" engineered wood and a 5/8" maple cap.

HIGH DEFINITION

To produce the highest definition woodgrain fiberglass doors, it starts with high quality fiberglass that is transformed using our unique NVD Technology. Our skins have a minimum thickness of 0.09" to 0.175" to accommodate inlays and routed designs.

PERFORMANCE

All of our doors are insulated with high density, CFC free, polyurethane foam. Our formula improves energy efficiency & sound abatement.

CONSTRUCTION

Doors are constructed using rot resistant composite top and bottom rails.

Engineered wood stile & polyurethane foam core

Sharp distinctive embossment deep definition

Smooth fiberglass skin with brush stroke finish.

Skin thickness is 0.090" (certain styles available in 0.175" for engraving & inlays)

Engineered wood stiles with hardwood maple edge cap 4-1/16" both sides full length

Kerf notched composite bottom rail

MOLDED FIBERGLASS DOOR LITE FRAMES & SIMULATED DIVIDING LITES (SDLs)

MasterGrain™ molds their own patented woodgrain and smooth fiberglass door lite frames that use a clip assembly system that eliminates the need for unsightly screws and plugs to deliver a unique uninterrupted look. MasterGrain also offers molded fiberglass simulated divided lites (SDLs).

- Fiberglass frames are more rigid than plastic frames.
- No welded corners ensures a tight weather seal to the door and minimizes distortion.
- Traditional plugged door lite system uses screws and plugs to deliver certified performance for impact, air, water and cycle testing.
- Molded fiberglass SDL bars provide an energy-efficient way to create a number of design configurations for a completely custom look.
- Door lite frames and SDLs can be stained to match door panels and all other MasterGrain door components for a seamless beautiful aesthetic.

SDL's come pre-taped and notched to create a beautiful lap-joint.

The wood & stain swatch imagery represented on this color chart has been provided to give you the best possible visual representation of the Millwork 360 Stock Stain Offering.

While every effort has been made to supply you with the most accurate photographic representation of our products, internet technology limitations prevent us from guaranteeing an exact color match. These limitations may include, but are not limited to: variations in individual user's monitor settings, calibration settings, color print settings, and image color compression. We cannot guarantee that your doors will be an exact match to the colors represented on this chart.

Before purchasing our doors, we recommend that you view an actual color sample.
